AGROOPERADORA DE SILOS Y BODEGAS®

Quarantine Treatments

A.- Quarantine treatments with aluminum phosphide

1.- We are certified under the following:

NOM-022-FITO-1995 NUM. DE CERTIFICADO ETCQ 25001081/2012
From the Vegetable Sanitation General Direction and SAGARPA.
This certificate authorizes us to offer quarantine treatments to ships that are mobilizing any type of national or exportation grain, product or sub-product.
After each aluminum phosphide quarantine treatment; a phytosanitary fumigation certificate is provided.

B.- Additional Services

2.- We offer vessel sanitation prior to loading of the product with specific focus on; ionized water, tecno fungi and protective products towards the inactivation of spores that produce aflatoxins.
3.- We have a lab designed to analyze aflatoxins. Determination of aflatoxins B1,B2,G1,G2 with express results minimizing dead times.
4.- Treatment for Aflatoxin Control, significant reduction in fungus. Guaranteed service.
5.- Quality Sampling and analysis for the classification of the grain. (Certification).
